Record Type: UTC

Transportation graduate students from the three campuses of the University of Alabama System are engaged in a variety of transportation related research activities. This project provides a forum for transportation students to present their research to students and faculty members from their home campuses and as well as to transportation faculty and students from other campuses of the University of Alabama System. Students are selected to make presentations based upon competitive review of abstracts. Those who make presentations receive funding to travel to the Transportation Research Board Annual Meeting in Washington, DC. While at the meeting students are given assignments (paper sessions and committee meetings to attend) to stretch their knowledge of their specialty fields.
