Project #11306: Student Funding to Attend TRB Conference

http://utca.eng.ua.edu/projects/new_project_results.asp?new_project=11306&submit=search

Record Type: UTC

Students from the three campuses of the University of Alabama are engaged in a variety of transportation-related research activities. This project intends to provide a mechanism to identify deserving transportation students; to establish a forum for the students to present the results of their research to transportation professionals, faculty, and other students in a professional setting; and to allow the students to expand their education. The mechanism for identifying appropriate students is through submittals of abstracts of student work. Faculty from the three campuses and possibly members of the UTCA advisory committee will evaluate the abstracts and identify students deserving to make technical presentations. The forum for student presentations will potentially be facilitated through the UAB ITE Student Chapter. Finally, the students will be able to expand their knowledge of important transportation topics by attendance at the Transportation Research Board Annual Meeting in Washington DC.
