The Alabama Department of Transportation (ALDOT) has reorganized its safety program to improve among other things its safety data, methodologies, and budgeting. At this point, it may be prudent to review all potential safety programs and activities to select those that have the best opportunity to help ALDOT reach its safety goals in a cost-effective and rational manner. That is difficult because it requires a good understanding of the many safety tools and methodologies available and a knowledge and vision of the safety tools and programs that are planned or in development. This project offers technical assistance, liaison between ALDOT and other agencies/organizations with ongoing safety work, and coordination assistance in selecting the best programs for ALDOT.

Start Date: 10/1/2015     End Date: 09/30/2016
Status: Active     Contract/Grant Number: 25326
Secondary Number:     UTCA Project #15416
Total Dollars:     $25,722
Source Organization: University Transportation Center for AL
