The objective of this proposed project is to develop and deliver advanced training courses on roundabout design for the Alabama Department of Transportation (ALDOT). It is intended to ensure consistency across the State in the design of roundabouts at new installations and in the case of retrofit/redesign of existing intersections.

The courses will be developed and conducted by a team led by the University of Alabama. Two roundabout design experts: Gresham Smith & Partners and NE Roundabouts, will work under the supervision of UA (as directed by ALDOT) to conduct necessary background research and production work to develop all course materials (slides, handouts, hand-on exercises, etc...)

Start Date: 2017/06/01
End Date: 2017/09/30
Status: Active
Contract/Grant Number: GR26039
